

Vincentius Edward

Full Stack Web Developer

Jakarta, Indonesia | +6281398598845 | vincentiusedward31@gmail.com | [JobStreet](#) | [Github](#)

SUMMARY

Hactiv8 graduate and transitioning into web development, seeking junior or entry-level full-stack roles. Background in operations and team leadership with hands-on project experience building web applications; strong problem-solving, time-management, and communication skills. Fast learner who collaborates well in teams, eager to contribute to user-centered projects and continue growing under mentorship.

EDUCATION

Universitas Tarumanagara

Business Management

Jakarta, Indonesia

Agustus 2017 – April 2019

Hactiv8

Full Stack JavaScript Immersive Program ([Transcript](#))

Jakarta, Indonesia

November 2025 – April 2026

WORK EXPERIENCE

Babyface Planet

Bartender and Waiter

Jakarta, Indonesia

November 2022 – December 2024

- Executed dual-role responsibilities, seamlessly transitioning between high-volume bartending and floor service to maintain consistent guest satisfaction.
- Crafted a diverse menu of cocktails and beverages while simultaneously managing a dedicated section of tables in a fast-paced environment.

Kaffu

Part-time Barista

Jakarta, Indonesia

May 2021 – November 2022

- Prepared handcrafted espresso beverages following exact recipes and quality standards for milk steaming and latte art.
- Maintained deep product knowledge of coffee origins and flavor profiles to provide tailored recommendations to customers.

Mori Mori Japanese Street Cuisine

Assistant Operations Manager

Bali, Indonesia

October 2017 – April 2021

- Handled restaurant's operation by managing vendor relationships and procurement processes to optimize supply chain costs and ensure 100% inventory accuracy.
- Facilitated communication between executive leadership and front-line staff to ensure seamless execution of new business strategies.
- Managed daily financial reporting, payroll administration, and local regulatory compliance, ensuring 100% adherence to Balinese hospitality and health department standards.
- Coordinated with local influencers and tourism partners to drive foot traffic.

SKILLS

Languages: Bahasa Indonesia, English

Programming Languages: JavaScript, TypeScript, SQL, Git

Front End: Next.js, React JS, Redux, React Native, Lucide React. HTML & CSS, Apollo Client, Axios, TailwindCSS

Back End: Node.js, Next.js, Express, Sequelize, PostgreSQL, Apollo Server, MongoDB, Redis, Rest API, Socket.IO, Google Cloud/AWS

PROJECTS

[PendegarMu](#)

April 2026

Hacktiv8 Final Project where we made a web based application for people who are struggling with mental health, users can fill out the form we have and then based on the user's data, the app will recommend to them lots of psychiatrists that cater to their problems.

Tech stack: Typescript, NextJS, React Native, MongoDB, Mongoose, Redux, Lucide React, jsonwebtoken, jwtdecode, bcryptjs, dotenv, pusher, Next Auth, REST API

[UKEA E-commerce App](#)

February 2026

Hacktiv8 Project about an e-commerce app for staff to maintain stocks and sales.

Tech stack: Node.js, Express, Sequelize, PostgreSQL, ESLint, Axios, dotenv, bcryptjs, jsonwebtoken, jwtdecode, Jest, supertest, React, React-dom, Vite, JSX, TailwindCSS, multer, sweetalert2, Google Cloud Server.

[Pokedex Database](#)

February 2026

Hacktiv8 Project where I made a Pokemon database using PokeAPI (a public REST API) and have team building features, meta build recommendation from AI for competitive team building.

Tech stack: Node.js, Express, Sequelize, PostgreSQL, Axios, dotenv, bcryptjs, jsonwebtoken, jwtdecode, Jest, supertest, React, Vite, JSX, TailwindCSS, REST API, Google Cloud Server, Google/GenAI.

[Social Media Website](#)

January 2026

Hacktiv8 Group Project where we made a social media app similar to X and facebook.

Tech stack: Node.js, Express, EJS, bcryptjs, dotenv, Sequelize, PostgreSQL, nodemailer

[Personal Indie Website](#)

January 2026

A fun personal project for myself when I discovered people were trying to make their own personal indie website and bring back the Y2K era.

Tech stack: Javascript, HTML, bootstrapCSS, Firebase.

[Split Bill Calculator](#)

January 2026

Web based application that helps you split restaurant bills fairly and with QR code generator to share the calculation with others.

Tech stack: Javascript, HTML, bootstrapCSS, Firebase.

[Life RPG](#)

December 2025

A fun little project about gamified productivity tracker that transforms daily tasks into quest-based leveling. It bridges the gap between classic RPG mechanics and life organization.

Tech stack: Javascript, HTML, bootstrapCSS, Firebase.

[Easy Budgeting](#)

December 2025

A personal project for myself where I made a simple personal finance tracker that shows me where my money goes because I'm bad at keeping track of my expenses.

Tech stack: Javascript, HTML, bootstrapCSS, Firebase.
